Operational readiness and possible implications due to Covid-19	3
Balance Sheet - S.02.01	4
Own Funds – S.23.01	7
Solvency Capital Requirement - For undertakings on Standard Formula – S.23.01	10

HD Insurance Limited - Operational readiness and possible implications due to Covid-19.

The outbreak of coronavirus (COVID- 19) has created a new reality, and its impact cannot be foreseen due to its uniqueness and lack of historical data. This evolving situation raises concerns about the impact on the global economy, market volatility and the consequences for the insurance sector.

Our Company's advanced, in-house developed digital infrastructure and financial backbone allows us to weather this storm with minimal impact.

From the early stages of the coronavirus spread we established an Emergency Team comprised of members of the Company's management team in order to form and execute an action plan to minimise the impact on the Company's, to ensure that we could continue to serve our clients and to provide a safe working environment for our employees.

Please see below our initial impact analysis:

Business Continuity Planning / Operational Continuity

- All our employees, including our 24/7 emergency line and customer support teams, were immediately able to work from home. Since Tuesday 17 March, 100% of the Company's employees have been working remotely, ensuring that neither business continuity nor customer experience were disrupted in any way.
- The work that the Company has done over the past 4 years to digitalise every aspect of its value chain ensures that it will continue to sell/renew/endorse policies and pay claims to garages/policyholders through digital banking without the need for any physical interactions.
- Our strong belief is that the Greek and Cyprus consumer may emerge stronger and significantly more digital from this latest crisis.

Impact on insurance production, reserving and investment portfolio

- Our early experience over the past period shows that the claims and road assistance frequency will drop during the first part of the crisis – certainly a downward push on the motor loss ratio.
- All our policies are paid in full at inception through plastic or digital transfers hence no issues on credit risk relating to receivables and collections.
- Our new business and renewals are growing healthily as more consumers turn to digital channels across the economy.
- We expect that there will be no time-lag for insurance claims to be notified, assessed, and paid. We have commenced the process of evaluating our claim reserves in light of the current circumstances and we will continue to do this on an ongoing basis as fact patterns emerge.
- Our reserves are synced up each quarter with our two reinsurance partners (Munich Re and Swiss Re) – all claims are appropriately reserved according to the latest available data.
- We have no asset risk (no exposure to stocks, bonds, real estate, etc.) and our risk is well diversified across three multi-year quota share agreements.

Impact on business plans and the Company's solvency position

- We are re-examining our business plans and solvency in light of the above developments including the need for an emergency Own Risk Solvency Assessment.
- Our Board examines both the potential downside risks but also how we can most appropriately respond to this situation, ensuring that the wellbeing of our policyholders remain at the forefront of our strategy.
- We are taking proactive steps to maintain regulator and stakeholder confidence and are actively engaging with regulators and the markets.
- We do consider this event as a watershed moment for the industry to take a significant step towards digitalisation – something we have been working on, heavily investing and preparing for a number of years.
